

## RNLI

The Queens Head is proud to raise regular money for 'Lifeboats for Dengie' and is the top pub in the area for contributions towards this. If you wish to support this important cause then please visit the RNLI site or ask Jim how you can help out. [Click here](#) to visit the RNLI site and find out how you can help contribute.

History of the RNLI at Burnham on Crouch Burnham on Crouch has been the base for a lifeboat since 1966 when the inshore lifeboat station was established with a D class inshore lifeboat behind the Royal Corinthian Yacht Club. The inshore rescue boat was then launched via a trailer and the yacht club ramp.

In 1998 a new boathouse was built at Burnham Yacht Harbour which made launching much quicker.

By 1996 the station was upgraded with the provision of a larger B class Atlantic 21 lifeboat to supplement the D class and in 1997 this was further upgraded with a new B class Atlantic 75 lifeboat.

In 2002 Burnham RNLI opened a new floating boathouse which is one of only 3 in the UK Burnham on Crouch RNLI: [www.burnham-rnli.org](http://www.burnham-rnli.org) Content sourced from [www.burnham.org.uk](http://www.burnham.org.uk)
